

Lumina 6A LED

Beautiful and tough backlit RF (8.2 MHz) system that shines in both loss prevention and advertising. Use the backlit panels to advertise your store specials, while using its top-notch detection rate to catch bad guys in the act.

Lightweight yet tough thanks to its aluminum construction, the Lumina 6A offers exceptional detection rate while easily fitting into any store environment.

The Lumina 6A's Active Response System automatically adjusts the system to block interference ensuring reliable operation even in challenging environments.

KEY FEATURES

- > Highly reliable system with high detection rate
